

DEPARTMENT OF COMPUTER APPLICATIONS

REGULATONS, CURRICULUM AND SYLLABUS

Under CBCS

(Applicable for Students admitted from Academic Year 2019-20)

MCA (MASTER OF COMPUTER APPLICATIONS)

SPECILIZATION IN BIG DATA ANALYTICS

(2 Years) Regulation 2018

SCHOOL OF COMPUTING SCIENCES

DEPARTMENT OF COMPUTER APPLICATIONS

DEPARTMENT OF COMPUTER APPLICATIONS VISION AND MISSION

VISION

The department of Computer Applications aims to transform aspiring students into software professionals with a high degree of technical skills and to inculcate a research mind set.

MISSION

- **M1.** To provide strong theoretical foundations complemented with extensive practical training.
- **M2.** To design and deliver curricula to meet the changing needs of industry.
- **M3.** To establish strong collaborations with industry, R&D and academic institutes for training and research.
- **M4.** To promote all-round development of the students through interaction with alumni and industry

MCA (MASTER OF COMPUTER APPLICATIONS) PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

The program is expected to enable the students to

- **PEO 1:** To prepare graduates to be successful professionals in industry, government, academia, research, entrepreneurial pursuit and consulting firms.
- **PEO 2:** To prepare graduates to achieve peer-recognition, as an individual and as a team player, through demonstration of good analytical, design, implementation and interpersonal skills.
- **PEO 3:** To prepare graduates to contribute to society as broadly educated, expressive, ethical and responsible citizens with proven expertise.
- **PEO 4:** To prepare graduates to pursue life-long learning to fulfill their goals.

PROGRAM OUTCOMES (ALIGNED WITH GRADUATE ATTRIBUTES) (PO)

At the end of this program, graduates will be able to

PO 1 Computational Knowledge: Apply knowledge of computing fundamentals, computing specialisation, mathematics, and domain knowledge appropriate for the computing specialisation to the abstraction and conceptualization of computing models from defined problems and requirements.

- **PO 2** Problem Analysis: Identify, formulate, research literature, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.
- **PO 3** Design /Development of Solutions: Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- **PO 4** Conduct Investigations of Complex Computing Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO 5** *Modern Tool Usage:* Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to *complex* computing activities, with an understanding of the limitations.
- **PO 6** *Professional Ethics:* Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.
- **PO 7** *Life-long Learning:* Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.
- **PO 8** Project management and finance: Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO 9** *Communication Efficacy:* Communicate effectively with the computing community, and with society, about *complex* computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.
- **PO 10** Societal and Environmental Concern: Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.
- **PO 11** Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
- **PO 12** Innovation and Entrepreneurship: Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

PROGRAM SPECIFIC OUTCOMES (PSO)

- **PSO 1:** Enable the students to design suitable data models, appropriate architectures and analytics techniques for efficient implementation of complex systems
- **PSO 2:** Enable the students to design and integrate systems for providing interactive solutions for healthcare applications
