

HINDUSTAN

INSTITUTE OF TECHNOLOGY & SCIENCE
(DEEMED TO BE UNIVERSITY)

DEPARTMENT OF COMPUTER APPLICATIONS

**REGULATIONS,
CURRICULUM AND SYLLABUS**

Under CBCS

(Applicable for Students admitted from Academic Year 2019-20)

MCA (MASTER OF COMPUTER APPLICATIONS)

SPECIALIZATION IN BIG DATA ANALYTICS

(2 Years)
Regulation 2018

SCHOOL OF COMPUTING SCIENCES

DEPARTMENT OF COMPUTER APPLICATIONS

**DEPARTMENT OF COMPUTER APPLICATIONS
VISION AND MISSION**

VISION

The department of Computer Applications aims to transform aspiring students into software professionals with a high degree of technical skills and to inculcate a research mind set.

MISSION

- M1.** To provide strong theoretical foundations complemented with extensive practical training.
- M2.** To design and deliver curricula to meet the changing needs of industry.
- M3.** To establish strong collaborations with industry, R&D and academic institutes for training and research.
- M4.** To promote all-round development of the students through interaction with alumni and industry

**MCA (MASTER OF COMPUTER APPLICATIONS)
PROGRAMME EDUCATIONAL OBJECTIVES (PEO)**

The program is expected to enable the students to

- PEO 1:** To prepare graduates to be successful professionals in industry, government, academia, research, entrepreneurial pursuit and consulting firms.
- PEO 2:** To prepare graduates to achieve peer-recognition, as an individual and as a team player, through demonstration of good analytical, design, implementation and interpersonal skills.
- PEO 3:** To prepare graduates to contribute to society as broadly educated, expressive, ethical and responsible citizens with proven expertise.
- PEO 4:** To prepare graduates to pursue life-long learning to fulfill their goals.

PROGRAM OUTCOMES (ALIGNED WITH GRADUATE ATTRIBUTES) (PO)

At the end of this program, graduates will be able to

- PO 1** *Computational Knowledge:* Apply knowledge of computing fundamentals, computing specialisation, mathematics, and domain knowledge appropriate for the computing specialisation to the abstraction and conceptualization of computing models from defined problems and requirements.

- PO 2** *Problem Analysis:* Identify, formulate, research literature, and solve *complex* computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.
- PO 3** *Design /Development of Solutions:* Design and evaluate solutions for *complex* computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- PO 4** *Conduct Investigations of Complex Computing Problems:* Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO 5** *Modern Tool Usage:* Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to *complex* computing activities, with an understanding of the limitations.
- PO 6** *Professional Ethics:* Understand and commit to professional ethics and cyber regulations, responsibilities, and norms of professional computing practice.
- PO 7** *Life-long Learning:* Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.
- PO 8** *Project management and finance:* Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO 9** *Communication Efficacy:* Communicate effectively with the computing community, and with society, about *complex* computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.
- PO 10** *Societal and Environmental Concern:* Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.
- PO 11** *Individual and Team Work:* Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
- PO 12** *Innovation and Entrepreneurship:* Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

PROGRAM SPECIFIC OUTCOMES (PSO)

PSO 1: Enable the students to design suitable data models, appropriate architectures and analytics techniques for efficient implementation of complex systems

PSO 2: Enable the students to design and integrate systems for providing interactive solutions for healthcare applications

SEMESTER – I

COURSE TITLE		ADVANCED DATA STRUCTURES AND ALGORITHMS USING PYTHON		CREDITS	4
COURSE CODE	CAA3701	Course Category	PC	L-T-P-C-S	3-0-2-4-2
CIA	60%			ESE	40%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Explain the basic of data structure.				1, 2, 3, 5
2.	Solve problems using trees.				1, 2, 5, 7
3.	Implement the sorting.				1, 2, 3, 7
4.	Implement and develop graphs.				2, 3, 5
5.	Implement and develop algorithms.				1, 2, 3, 5, 7
MODULE 1 – INTRODUCTION TO DATA STRUCTURE					(12L)
Problem solving concepts, ADT, Stack, Queue, List. Practical Component: <ul style="list-style-type: none"> ➤ Installation of python and its libraries. ➤ Do the operation in stack, queue and list. 					
MODULE 2 – TREES					(12L)
Preliminaries, Binary Trees Binary Search Trees, AVL Trees, Tree Traversals, Hashing, Hash Function, Hash families Separate Chaining, Open addressing. Practical Component: (using Python) <ul style="list-style-type: none"> ➤ Design a BST and explore the operation. ➤ Design a balanced AVL tree. 					
MODULE – 3 : SORTING					(12L)
Preliminaries, Insertion Sort, Shells sort, Heap sort– Merge sort–Quick sort– External Sorting– Topological Sort. Practical Component: (using Python) <ul style="list-style-type: none"> ➤ Explore the types of sorting. 					
MODULE – 4 GRAPHS					(12L)
Graph connectivity, Random walks on graph, on line paging algorithm, adversary models. Practical Component: (using Python) <ul style="list-style-type: none"> ➤ Design a graph and its connectivity. ➤ Design a model using on line paging algorithm. 					
MODULE 5 – ALOGRITHM					(12L)
Randomized algorithm, a min-cut algorithm, Random treaps, Mulmuley games, Markovs chains. Practical Component: (using Python) <ul style="list-style-type: none"> ➤ Explore the randomized algorithm. ➤ Implementation of Markovs and its chain rule.

COURSE TITLE		STATISTICS FOR COMPUTER SCIENCE			CREDITS	4
COURSE CODE		MAA3706	COURSE CATEGORY	BS	L-T-P-C-S	4-0-0-4-1
CIA		50%			ESE	50%
LEARNING LEVEL		BTL-3 – APPLY				
CO	COURSE OUTCOMES					PO
Upon completion of this course, the students will be able to						
1	Develop statistical models for business analytics					1, 2
2	Use forecasting methods to support managerial, financial, and operational statistics.					1, 3, 7
3	Perform marketing analytics using statistical models.					1, 2, 4, 5
4	Analyze customer data for customer acquisition, retention, and profitability					2, 3, 7
5	Analysis of variance					3, 5, 4
MODULE 1: PROBABILITY						(12L)
Introduction to probability –Bayes theorem-Random variables-discrete random variable (Binomial, Poisson, Geometric), Continuous random variable (Uniform, Exponential and Normal distribution). Moment generating function. Suggested Activities: Basic knowledge on probability Suggested sources: Introduction to probability						
MODULE 2: TWO DIMENSIONAL RANDOM VARIABLES						(12L)
Joint distribution –Marginal and conditional distribution covariance –correlation and regression (linear and Multiple). Central limit theorem, Chebyshev’s inequality. Suggested Activities: Basic knowledge on probability Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan						
MODULE 3: THEORY OF SAMPLING AND TEST OF HYPOTHESIS						(12L)

Introduction to hypothesis, Large and small samples test -mean and variance (single and double), test, Independent of attributes and contingency table. Suggested Activities: Basic knowledge of sampling Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan	
MODULE 4: TIME SERIES ANALYSIS (12L)	
Introduction to Stochastic process, Time series as a discrete stochastic process. Stationarity, Main characteristics of stochastic process (mean, auto covariation and auto correlation function). Autoregressive models AR (p), Yull-Worker equation Auto regressive moving average models ARMA. Seasonality in Box –Jenkins model. Suggested Activities: Basic knowledge of Time series analysis Suggested sources: Time series-Maurice George kendall,j.k.Ord	
MODULE 5: DESIGN OF EXPERIMENTS (12L)	
Analysis of variance (one way & two ways) classification – completely randomized design – randomized block design – Lattin square design. Suggested Activities: Basic knowledge of design of experiments Suggested sources: Probability, Statistics and Random Processes-T.Veerarajan	
TEXT BOOKS

COURSE TITLE		DATABASE TECHNOLOGY			CREDITS	4	
COURSE CODE		CAA3702	COURSE CATEGORY		PC	L-T-P-C-S	3-1-0-4-1
CIA		50%			ESE	50%	
LEARNING LEVEL		BTL-4					
CO	COURSE OUTCOMES					PO	
Upon completion of this course, the students will be able to							
1.	Implement database design techniques.					1, 2, 3,	
2.	Implement normalization.					1, 2, 3, 7	
3.	Implement object relational database					1, 2, 3, 5	
4.	Implement distributed and parallel dbms					2, 3, 5	
5.	Create a design structured and unstructured DB and multimedia database					1, 2, 3,5,7,9	
MODULE 1 – DATABASE INTRODUCTION & DESIGN TECHNIQUES						(12L)	
Introduction to Database Systems, DBMS Architecture, Introduction to Data Modeling, ER Model, EER Model -Specialization/Generalization, Aggregation, Composition, Relational model algebra operations, ER, EER to Relational Model.							
MODULE 2 – ADVANCED DESIGN TECHNIQUE -NORMALIZATION						(12L)	
Normalization – Informal Guidelines, Functional dependencies, decomposition algorithms , Normal Forms up to 5NF, SQL - Basic & Advanced Operations, Query Processing, Query optimization, Storage and File organization.							
MODULE – 3 : OBJECT RELATIONAL DBMS						(12L)	
Introduction to Object Oriented Data Bases - Approaches - Modeling and Design - Persistence - Transaction - Concurrency - Recovery - Database Administration. Overview, Complex Data Types, ODBMS & ORDBMS, Structured Types and Inheritance in SQL, Table Inheritance, Object-Identity and Reference Types in SQL							
MODULE – 4 DISTRIBUTED DATABASE AND PARALLEL DBMS						(12L)	
Concepts, advantages, types, functions, architecture, data allocation, fragmentation, replication, transparencies, Date's rules, transaction management, concurrency control, dead lock, recovery2PC, 3PC.Partition techniques, Architecture, Parallel algorithms for sorting, Parallel join, Parallel Queries.							
MODULE 5 – SEMI STRUCTURED, UNSTRUCTURED DATA BASE						(12L)	
OEM, Overview of XML, DTD, XML schema, XML query languages, XML related technologies, XML and databases, Unstructured database – NOSQL – Overview – Definition – Types of NoSQL DB							
TEXT BOOKS

COURSE TITLE		OBJECT ORIENTED PROGRAMMING USING JAVA		CREDITS	4	
COURSE CODE		CAA3703	COURSE CATEGORY	PC	L-T-P-C-S	2-0-2-4-1
CIA		60%		ESE	40%	
LEARNING LEVEL		BTL-4				
CO	COURSE OUTCOMES				PO	
Upon completion of this course, the students will be able to						
1.	Solve real world problems using OOP techniques.				1, 2, 3	
2.	Solve problems using java collection framework and I/O classes.				1, 2, 7	
3.	Implement Interfaces and Packages				1, 2, 3, 5	
4.	Develop multithreaded applications with synchronization.				1, 3, 5	
5.	Develop applets for web applications and able to design GUI based applications				1, 2, 3, 5	
MODULE 1 – INTRODUCTION TO JAVA					(12L)	
Classes and Instances, Class Hierarchies- Inheritance, Method binding, Overriding and Exceptions, Summary of Object-Oriented concepts. Java buzzwords, An Overview of Java, Data types, Variables and Arrays, operators, expressions, control statements, Introducing classes, Methods and Classes, String handling, Inheritance concept, Inheritance basics, Member access, Constructors, Creating Multilevel hierarchy, super uses, using final with inheritance, Polymorphism-adhoc polymorphism, pure polymorphism, method overriding, abstract classes, Object class, forms of inheritance- specialization, specification, construction, extension, limitation, combination, benefits of inheritance, costs of inheritance.						
MODULE 2 – PACKAGES, INTERFACES AND I/O STREAMS					(12L)	

Defining a Package, CLASSPATH, Access protection, importing packages. **Interfaces-** defining an interface, implementing interfaces, Nested interfaces, applying interfaces, variables in interfaces and extending interfaces. Introduction to Stream - Introduction to NIO, working with Stream Classes, working with Files, working with Buffers, working with Character Arrays, working with the Print Writer Class, working with the Stream Tokenizer Class, implementing the Serializable Interface, working with the Console Class, Printing with the Formatter Class, scanning Input with the Scanner class.

MODULE – 3 : EXCEPTION HANDLING AND MULTITHREADING (12L)

Fundamentals of exception handling, Exception types, Termination models, Uncaught exceptions, using try and catch, multiple catch clauses, nested try statements, throw, throws and finally, built-in exceptions, creating own exception sub classes. Threading : Differences between thread-based multitasking and process-based multitasking, Java thread model, creating threads, thread priorities, synchronizing threads, inter thread communication.

MODULE – 4 NETWORKING WITH JAVA.NET (12L)

Introduction to Networking - Networking Enhancements in Java SE 8, Client-Server Networking, Proxy Servers, Domain Name Service, Understanding Networking Interfaces and Classes in the java.net Package, Internet Addressing, Understanding Sockets in Java, Understanding the URL Class, Understanding the URI Class, Working with Datagrams.

MODULE 5 – COLLECTION FRAMEWORK AND FUNCIONAL PROGRAMMING (12L)

Collections overview, Collection Interfaces, The Collection classes- Array List, Linked List, Hash Set, Tree Set, Priority Queue, Array Deque. Accessing a Collection via an Iterator, Using an Iterator, The For-Each alternative, Map Interfaces and Classes, Comparators, Collection algorithms, Arrays, The Legacy Classes and Interfaces- Dictionary, Hash table ,Properties, Stack, Vector More Utility classes, String Tokenizer, Bit Set, Date, Calendar, Random, Formatter, Scanner

Functional Programming– Introduction, Key concepts, Pure functional programming- No State, Immutable variables, favor recursion over looping.

TEXT BOOKS

1.	Java The complete reference, 9th edition, Herbert Schildt, McGraw Hill Education (India) Pvt. Ltd, 2014.
2	Understanding Object-Oriented Programming with Java, updated edition, T. Budd, Pearson Education. 1999

COURSE CODE	CAA3704	COURSE CATEGORY	PC	L-T-P-C-S	3-0-0-3-1
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Illustrate the flow of information from one node to another node in the networks.				1, 2, 7
2.	Identify the components required to build different types of networks				1, 2, 3, 4
3.	Understand the functionalities needed for data communication into layers				1, 2, 3, 4,
4.	Understand the working principles of various application protocols				3, 4, 5
5.	Acquire knowledge about security issues and services available				3, 4, 5, 7
MODULE 1 - NETWORK FUNDAMENTALS					(9L)
Uses of Networks – Categories of Networks -Communication model –Data transmission concepts and terminology – Protocol architecture – Protocols – OSI – TCP/IP – LAN Topology – Transmission media.					
MODULE 2 – DATA LINK LAYER					(9L)
Data link control - Flow Control – Error Detection and Error Correction - MAC – Ethernet, Token ring, Wireless LAN MAC – Blue Tooth - Bridges.					
MODULE – 3 : NETWORK LAYER					(9L)
Network layer – Switching concepts – Circuit switching – Packet switching –IP — Datagrams – IP addresses- IPV6– ICMP – Routing Protocols – Distance Vector – Link State- BGP.					
MODULE – 4 TRANSPORT LAYER					(9L)
Transport layer –service –Connection establishment – Flow control – Transmission control protocol – Congestion control and avoidance – User datagram protocol. -Transport for Real Time Applications (RTP).					
MODULE 5 – APPLICATION LAYER					(9L)
Applications - DNS- SMTP – WWW –SNMP- Security –threats and services – Dynamic domain name system – Encapsulation - web security –SSL.

LEARNING LEVEL	BTL-4					
CO	OUTCOMES				PO	
Upon completion of this course, the students will be able to						
1	Identify a real time work helpful for the society				1,2,3,5,6,9,10,11,12	
2	Develop a solution for the problem				1,2,3,5,6,9,10,11,12	
3	Develop an application by using relevant computer application concepts				1,2,3,5,6,9,10,11,12	
MINI PROJECT						
Design and develop practical solutions to real life problems related to needs of the society . The theoretical knowledge gained from the subject should be applied to develop effective solutions to various computing problems. Submit a complete report of the project work carried out.						

Semester II

COURSE TITLE		WEB DESIGN AND DEVELOPMENT		CREDITS	3
COURSE CODE	CAA3705	COURSE CATEGORY	PC	L-T-P-C-S	3-0-0-3-1
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Explore markup languages features and create interactive web pages using them.				1, 2, 3
2.	Design Client side validation using scripting languages				1, 2, 3, 5
3.	Acquire knowledge about Open source JavaScript libraries				1, 2, 3
4.	Design front end web page and connect to the back end databases.				3, 5, 7
5.	Explore the features of various platforms and frameworks used in web applications development.				3, 4, 5, 7
MODULE 1 – UI DESIGN					(9L)
Markup Language (HTML): Introduction to HTML and HTML5 - Formatting and Fonts - CommentingCode – Anchors – Backgrounds – Images – Hyperlinks – Lists – Tables – Frames - HTML Forms.					
MODULE 2 – CASCADING STYLE SHEET (CSS)					(9L)
Introduction to Cascading Style Sheet (CSS): The need for CSS, Introduction to CSS – Basic syntax and structure - Inline Styles – Embedding Style Sheets - Linking External Style Sheets – Backgrounds - Manipulating text - Margins and Padding - Positioning using CSS.					
MODULE – 3 : INTRODUCTION TO JAVASCRIPT					(9L)
Introduction - Core features - Data types and Variables - Operators, Expressions, and Statements - Functions - Objects - Array, Date and Math related Objects - Document Object Model - Event Handling - Controlling Windows & Frames and Documents - Form handling and validations.					
MODULE – 4 ADVANCED JAVASCRIPT					(9L)
Browser Management and Media Management – Classes – Constructors – Object-Oriented Techniques in JavaScript – Object constructor and Prototyping - Sub classes and Super classes – JSON - jQuery : Selectors, DOM Manipulation with jQuery, AJAX with jQuery, and AJAX - Other Javascript Frameworks.					
MODULE 5 – PHP					(9L)
Introduction - How web works - Setting up the environment (LAMP server) - Programming basics - Print/echo - Variables and constants – Strings and Arrays – Operators, Control structures and looping structures – JS: Angular JS – Node JS - Functions – Reading Data in Web Pages - ZEND Framework - Embedding PHP within HTML - Establishing connectivity with MySQL database.

COURSE TITLE		DATA WAREHOUSING AND DATA MINING		CREDITS	4
COURSE CODE	CAA3706	COURSE CATEGORY	PC	L-T-P-C-S	2-0-2--4-1
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-2				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Understand about Data Mining fundamentals				1, 2
2.	Understand the Data warehouse implementation				1, 2, 3, 4, 7
3.	Understand the mining rules				3, 5, 7
4.	Implement Classification algorithms				1, 2, 3, 5, 7
5.	Implement Clustering algorithms.				1, 2, 3, 5, 7
MODULE 1 – Introduction					(12L)
Fundamentals of data mining, Data Mining Functionalities, Classification of Data Mining systems, Data Mining Task Primitives, Integration of a Data Mining System with a Database or a Data Warehouse System, Major issues in Data Mining. Data Preprocessing: Need for Preprocessing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction, Discretization and Concept Hierarchy Generation.					

MODULE 2 – Data warehousing		(12L)
Data Warehouse and OLAP Technology for Data Mining: Data Warehouse, Multidimensional Data Model, Data Warehouse Architecture, Data Warehouse Implementation, Further Development of Data Cube Technology, From Data Warehousing to Data Mining Data Cube Computation and Data Generalization: Efficient Methods for Data Cube Computation, Further Development of Data Cube and OLAP Technology, Attribute-Oriented Induction.		
MODULE – 3 : Association Mining		(12L)
Mining Frequent Patterns, Associations and Correlations: Basic Concepts, Efficient and Scalable Frequent Item set Mining Methods, Mining various kinds of Association Rules, From Association Mining to Correlation Analysis, Constraint-Based Association Mining		
MODULE – 4 : Classification		(12L)
Classification and Prediction: Issues Regarding Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Rule-Based Classification, Classification by Back propagation, Support Vector Machines, Prediction, Accuracy and Error measures, Evaluating the accuracy of a Classifier or a Predictor, Ensemble Methods.		
MODULE -5 Clustering Methods		(12L)
Cluster Analysis Introduction :Types of Data in Cluster Analysis, A Categorization of Major Clustering Methods, Partitioning Methods, Hierarchical Methods, Density-Based Methods, Grid-Based Methods, Model-Based Clustering Methods, Clustering High-Dimensional Data, Constraint-Based Cluster Analysis, Outlier Analysis.		
LAB / MINI PROJECT/FIELD WORK		
TEXT BOOKS		
1.	Data Mining – Concepts and Techniques - Jiawei Han & Micheline Kamber, Morgan Kaufmann Publishers, Elsevier,3rd Edition, 2012.	
2.	Introduction to Data Mining – Pang-Ning Tan, Michael Steinbach and Vipin Kumar, Pearson education.2006.	
REFERENCE BOOKS		
1.	Data Mining Techniques – Arun K Pujari,2nd edition, Universities Press	
2.	Chen, Hsinchun, Roger HL Chiang, and Veda C. Storey. "Business intelligence and analytics: from big data to big impact." <i>MIS quarterly</i> (2012)	
E BOOKS

MOOC		
1.	https://nptel.ac.in/courses/106105174/	

COURSE TITLE		MACHINE LEARNING			CREDITS	4
COURSE CODE		CAA3707	COURSE CATEGORY	PC	L-T-P-C-S	3-1-0-4-1
CIA		50%			ESE	50%
LEARNING LEVEL		BTL-4 – ANALYZE				
CO	COURSE OUTCOMES					PO
Upon completion of this course, the students will be able to						
1	Apply multilayer perceptron using simple machine learning techniques.					1,2,3,5
2	Implement decision trees and statistics models					1,2,3,4,5
3	Compute data analysis for machine learning					1,2,3,4,5,7
4	Implement Genetic algorithm and reinforced learning for appropriate applications					1,2,3,4,7
5	Implement the Python programming for machine learning.					1,2,3,5
MODULE 1: Introduction						(12L)
Learning - Types of machine learning - Supervised learning - The brain and the neurons, Linear Discriminants -Perceptron - Linear Separability -Linear Regression - Multilayer perceptron - Examples of using MLP - Back propagation of error.						
Suggested Activities: Design a Multilayer Perceptron for Rain Forecasting system						
Suggested sources: Enrico C, Simon W, Jay R, Machine Learning Techniques for Space Weather, Elsevier, 2018						
MODULE 2: Classification Algorithms						(12L)
Decision trees - Constructing decision trees - Classification of regression trees - Regression example - Probability and Learning: Turning data into probabilities - Some basic statistics - Gaussian mixture models - Nearest Neighbor methods.						
Suggested Activities: Explore the Regression Examples in Machine Learning						
Suggested sources: Norman Matlof, "Statistical Regression and Classification: From Linear Models to Machine Learning", CRC Press, 2017.						
MODULE 3: Analysis						(12L)
The k-Means algorithm - Vector Quantization's - Linear Discriminant Analysis - Principal component analysis - Factor Analysis - Independent component analysis - Locally Linear embedding – Isomap - Least squares optimization - Simulated annealing.						
Suggested Activities: Simulated annealing / Modelling on any data science application.						
Suggested sources: L.M. Rasdi, Simulated Annealing Algorithm for Deep Learning, Procedia Computer Science, Volume: 72, 2015.						
MODULE 4: Optimization Techniques						(12L)

The Genetic algorithm - Genetic operators - Genetic programming - Combining sampling with genetic programming - Markov Decision Process - Markov Chain Monte Carlo methods: sampling - Monte carlo - Proposal distribution.

Suggested Activities: Design an Encryption algorithm using Genetic algorithm

Suggested sources: Harsh Bhasin, Application of Genetic Algorithms in Machine learning,, International Journal of Computer Science and Information Technologies, Vol. 2 (5), 2011.

MODULE 5: Python for Machine Learning (12L)

Baysean Networks - Markov Random moFields - Hidden Markov Models -Tracking methods. Python: Installation - Python for MATLAB AND R users - Code Basics - Using NumPy and MatPolitB.

Suggested Activities: Design a simple application using NumPy and MatPolitB.

Suggested sources: Rakshith Vasudev, Introduction to Numpy -1 : An absolute beginners guide to Machine Learning and Data science., 2017.

COURSE TITLE		SOFTWARE ENGINEERING			CREDITS	3
COURSE CODE		CAA3708	COURSE CATEGORY	PC	L-T-P-C-S	3-0-2-3-1
CIA		50%			ESE	50%
LEARNING LEVEL		BTL-4				
CO	COURSE OUTCOMES					PO
Upon completion of this course, the students will be able to						
1.	Understand the Software Engineering Process and Evaluation techniques.					1, 2, 4
2.	Plan and manage requirements at each stage of the software develop the models.					1, 2, 3, 4
3.	Learn about the design activity planning and behaviour management principles.					1, 2, 3, 4, 6, 8
4.	Develop skills to manage the various strategic phases involving testing techniques and various test methods.					3, 4, 5, 8
5.	Deliver successful software projects that support organization's strategic and agile process improvement.					3, 4, 5, 8, 9, 11
MODULE 1 – SOFTWARE PROCESS						(9L)
Process models – Defining a Framework Activity, Process Patterns, Process Assessment and improvement - Prescriptive Process Models – Specialized process models- The Unified Process – Personal and Team Process models – Process Technology – Product and Process.						
MODULE 2 – UNDERSTANDING REQUIREMENTS						(9L)
Requirements Engineering – Eliciting requirements – Developing use cases – Building the requirement model – Negotiating and validating requirements –Scenario Based Modelling – UML Models – Data modelling concepts – Class based modelling – Patterns for Requirement modelling.						
MODULE – 3 – DESIGN CONCEPTS						(9L)
Design Process – Design concepts – Software Architecture – Architectural Styles and Design – Assessing alternative architectural designs – architectural Mapping Using Data Flow – Component Level Design – Designing Class Based Components – Component level design for Web Apps – Designing Traditional Components – User Interface Design.						
MODULE – 4 SOFTWARE TESTING STRATEGIES						(9L)
Strategic approach for software testing – Test Strategies for Conventional Software – OO Software and testing – Validation testing – System Testing – The art of debugging – Internal and External views of testing – Basis path testing – White Box testing – Control structure testing – Block Box Testing – Model based Testing – Patterns for Software Testing.						
MODULE 5 – AGILE METHODOLOGY AND SOFTWARE PROCESS IMPROVEMENT						(9L)
What is agility – Agility and cost of change – What is an agile process – Extreme programming – Agile Process models – Tool set for the agile process – Software Process Improvement – SPI Process – CMMI – People of CMM – SPI Framework – SPI Return on Investment – SPI Trends.						
TEXT BOOKS:						
1.	Roger S Pressman, “Software Engineering ”, Tata McGraw- Hill Publications, 7 th Edition 2014.

COURSE TITLE		SOFTWARE DEVELOPMENT LAB			CREDITS	1
COURSE CODE		CAA3782	COURSE CATEGORY	PC	L-T-P-C-S	0-0-2-1-0
CIA		80%			ESE	20%
LEARNING LEVEL		BTL-4				
CO	OUTCOMES					PO
Upon completion of this course, the students will be able to						
1	Create use case diagrams					1, 2, 3
2	Develop skills to manage SDLC					1, 2, 8
3	Create software estimation					1, 2,4, 8
4	Analyse different software testing methods					3, 4, 5
LAB EXERCISES						
1. Practicing the different types of case tools such as Rational Rose / other Open Source for all the phases of Software development life cycle.						
2. Data modeling						
3. Source code generators						
4. Apply the following to typical application problems:						
a. Project Planning						
b. Software Requirement Analysis						
c. Software Design						
d. Data Modeling & Implementation						
5. Software Estimation						
6. Software Testing						

A possible set of applications may be the following:

- a. Library System
- b. Student Marks Analyzing System
- c. Text Editor.
- d. Create a dictionary.
- e. Telephone directory.
- f. Inventory System.

COURSE TITLE		WEB PROGRAMMING LABORATORY		CREDITS	1	
COURSE CODE		CAA3783	COURSE CATEGORY	PC	L-T-P-C-S	0-0-2-1-0
CIA		80%		ESE	20%	
LEARNING LEVEL		BTL-4				
CO	OUTCOMES				PO	
	Upon completion of this course, the students will be able to					
1.	Create simple three tier applications				1, 2, 4	
2.	Create Simple web pages using HTML & DHTML				1, 2, 4,5	
3.	Create client side validation scripts.				1, 2, 4	
4.	Create Web pages using HTML5 tags				3, 5	
5.	Create Web applications using Java Servlets				3, 5, 7	

LAB EXERCISES

1. Create a web page with the following.
 - a. Cascading style sheets.
 - b. Embedded style sheets.
 - c. Inline style sheets. Use our college information for the web pages.
2. Create a HTML form for reading Name, Age, Gender, Address, Payment Options, Phone number, Email address, preferred user name, various Area of Interest etc from the user.
3. Create a simple webpage using HTML frames to Include Images and Videos.
4. Write a Java Script program to validate the data including the email id entered by the user in the above form are in correct format. Display error message if input is not in correct format. Call the script when the page is submitted.
5. Create web page to display the rule and regulations for University Examination. Include the content from a separate file. Also display the information like last modified time size of file. Use SSI concept for the above task.
6. Simple application to demonstrate Servlets.
7. Design a simple online test web page in PHP
8. Write a PHP program to implement a session based counter.
9. Write a PHP program to input previous reading and present reading and prepare an electricity bill.

Semester III

COURSE TITLE		SOFTWARE TESTING AND QUALITY ASSURANCE		CREDITS	4
Course Code	CAA3709	Course Category	PC	L-T-P-C-S	2-0-2-4-1
CIA	60%			ESE	40%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
	Upon completion of this course, the students will be able to				
1.	Understand the basic knowledge of errors and faults in software testing project				1, 2, 3,4, 5
2.	Identify the software testing fundamentals and Engineering methods.				3, 4, 5, 7
3.	Identify the various software testing types and methods.				5, 7, 8
4.	Write various test cases and skills to communicate with their teammates to conduct their practice-oriented software testing projects				3, 4, 5, 7
5.	Use automation testing and quality assurance tools for their testing projects.				1, 2, 3, 5, 7
MODULE 1 – INTRODUCTION					12L
Software Errors-Bugs- Cause of Bugs- Cost of Bugs- Software Tester- Software Development Process-Testing Axioms-Software testing Terms and Definitions					
MODULE 2 – TESTING FUNDAMENTALS					12L
Examining the Specifications-Black Box and White Box Testing-Static and Dynamic Testing-Low Level Specification Test Technique-Static and Dynamic Black Box testing-Equivalence Partitioning-Data Testing- State Testing-Other Black Box Testing Techniques-Static White Box Testing-Dynamic White Box Testing-Testing the Pieces-Data Coverage- Code Coverage.					
MODULE – 3 : TESTING TYPES AND APPROACHES					12L
Configuration Testing-Compatibility Testing-Foreign Language Testing-Usability Testing-Testing the Documentation-Website Testing					
MODULE -4 : TEST MANAGEMENT AND DOCUMENTATION					12L
The Goal of Test Planning-Test Planning topics-Writing and Tracking Test Cases-Goal of Test Case Planning –Test Case Planning Overview- Test Case Tracking- Reporting what you find- A bug life cycle-Bug Tracking Systems-Metrics in Testing-Common Project Level Metrics.					
MODULE – 5 AUTOMATION TESTING AND QUALITY ASSURANCE					12L
Benefits of Automation and Tools-Test Tools-Software Test Automation-Random Testing-Software Quality Assurance-Testing and Quality Assurance in workspace-Test management and organizational structures- Capability Maturity Model-ISO 9000					
LAB / MINI PROJECT/FIELD WORK

COURSE TITLE	DevOps			CREDITS	4
COURSE CODE	CAA3710	COURSE CATEGORY	PC	L-T-P-C-S	2-0-2-4-1
CIA	60%			ESE	40%
LEARNING LEVEL	BTL-2				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Identify the difference between Agile and Devops.				1, 2, 3,4, 5
2.	Practice of GitHub				3, 4, 5, 7
3.	Illustrate various Building tools				3, 4, 5, 7
4.	Analyse various Testing tools				3, 4, 5, 7
5	Illustrate various Configuration management tools				3, 4, 5, 7
MODULE 1 – INTRODUCTION					(12L)
Learning Objectives – DevOps Overview – Relationship between Agile and DevOps – DevOps Tool chain - Challenges with the traditional approach – Addressing challenges through DevOps – DevOps approach to the challenges – Overview of the DevOp tools – workflow of DevOps – JIRA					
Suggested sources : https://www.atlassian.com/software/jira/guides/use-cases/what-is-jira-used-for					
MODULE 2 – VERSION CONTROL SYSTEMS					(12L)
Overview of version control systems – role of version control systems – Types of control systems and their supporting tools – Overview of Git – Overview of Source code and Version Control hosts – Deploy the files to GitHub.					
Suggested Source : https://github.com/features					
MODULE – 3 CONTINUOUS INTEGRATION AND BUILDING TOOL					(12L)

Importance of continuous Integration – Overview and Features of Jenkins – Set up Jenkins – Overview and Features of Maven - Setup Maven- Overview and Features of TeamCity – Setup TeamCity –

Suggested Source :

1. <https://www.jenkins.io/doc/>
2. <http://maven.apache.org/>
3. https://www.tutorialspoint.com/continuous_integration/continuous_integration_creating_project_teamcity.htm

MODULE – 4 : SOFTWARE AND AUTOMATION TESTING FRAMEWORKS (12L)

Software Testing overview – Testing levels Approach and Automation Tools – Test driven development approaches and JUnit5 – Behavior driven development approach with cucumber.

Suggested Source : <https://howtodoinjava.com/junit-5-tutorial/>
<https://junit.org/junit5/docs/current/user-guide/>

MODULE – 5 CONFIGURATION MANAGEMENT TOOLS (12L)

Overview of configuration management tools – overview of puppet – puppet configuration – overview of Chef – Chef configuration - overview of Ansible – Ansible configuration- containerization and docker.

Suggested Source :

1. <https://www.tutorialspoint.com/puppet/index.htm>
2. <https://puppet.com/blog/how-get-started-puppet-beginners-guide/>
3. <https://www.tutorialspoint.com/chef/index.htm>

COURSE TITLE	Presentation Skills and Academic Writing			CREDITS	1
Course Code	ELA4383	Course Category	BS	L-T-P-S	TCH
CIA	80%			ESE	20%
LEARNING LEVEL	BTL5,6				
	COURSE OUTCOMES				PO
1.	To develop effective communication skills with emphasis on Listening, Speaking, Reading and Writing.				5, 6, 10
2.	To excel in presentation skills and enhance competence in scholarly communications				9,10
3.	To develop the syntax and improve the writing skills				2,4, 10
4.	to enhance the core features of the scientific writing style in projects, technical reports				6,7,10, 12
5.	To understand the techniques to participate and excel in group discussions				10, 12
Prerequisites : Plus Two English-Intermediate Level					
Suggested Activities: Lab Practical Sessions (Presentation Skills, GD's, Online modules activities)					
Examination: Practical examination (oral technical presentations and online examination)					
Practical Record submission: Self Analysis report, Technical Presentation, Report Writing and GD					
MODULE 1 Listening & Reading Skills					
Importance of Listening skills-Listening to native speakers,-Listening and sequencing of sentences – Listening and answering the questions - Cloze Exercises – Vocabulary building –Reading Skills & Comprehension					
MODULE 2 Presentation Skills					
Presentation techniques-tips of how to be an effective presenter-Preparation — how to deal with fear and anxiety 2) Voice, pace and gesture — how to speak, stand and move. 3) Getting live feedback — how to interact with the audience – Practical session on technical presentations					
MODULE 3 Group Discussion					
Group Discussion - Strategies in GD – Team work – Body Language – Mock GD – Video Samples					
MODULE 4 Professional Communication & Etiquette					
Professional Speaking – Conversation Practice- Role Plays - Use of appropriate and ethical language in professional contexts- Netiquette--Email etiquette- Mobile phone etiquette					
MODULE 5 Academic writing					
Techniques of effective writing – Elements of Writing- Writing Clear and Effective Sentences and Paragraphs, Developing Unity, Coherence - Writing Technical Reports - Project Writing,

ELECTIVES

COURSE TITLE		Web Analytics		CREDITS	3
Course Code	CAB3721	Course Category	PE	L-T-P-C-S	3-0-0-3-0
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
	At the end of the course the students will be able to				
1.	Understand the concepts of web analytics				1,2
2.	Apply the web analytics basics				1, 4,
3.	Understand and apply the strategies of web analytics				1,2,3
4.	Apply the concepts of web analytics into various websites like Google, social media and mobile				1,2,3
5.	Apply Mobile Analytics basics				1,2,3,4
MODULE 1 – INTRODUCTION					(9L)
<p>Introduction: Web analytics, History, current landscape and challenges, Five ‘Whs’ of web analytics Data Collection: Clickstream data, web logs, web beacons, packet sniffing, java Script tags, Types of data: outcomes data, Research data, competitive data</p>					
MODULE2:FUNDAMENTALS OF WEB ANALYTICS AND DATA ANALYSIS					(9L)
<p>Capturing data, Type and size of data, Innovation, Integration, selection of web analytic tool, web analytic dashboard, types of metrics to track the data, Key Performance Indicators (KPI), identification of audience, site referrers and most important pages. Qualitative Analysis: Essence of Customer Centricity, Lab usability testing, Heuristic evaluations, Site Visits and surveys</p>					
MODULE 3 – WEB ANALYTICS CONCEPTS AND STRATEGIES					(9L)
<p>URI, URL parameters, Cookies, Geotargeting, Geotagging, mobile phone tracking, Focus on Customer Centricity, Solve for business questions, follow the 10/90 rule, Hire great web analytics, Identify optimal organizational structure and responsibilities, Centralization, Decentralization, centralized decentralization</p>					
MODULE 4 – GOOGLE WEB ANALYTICS					(9L)
<p>Installing Google web analytics, setting up: Account, property, view, users profiles and filters, tracking traffic channels, E-commerce tracking, On-site search tracking, On-page interacting tracking, Analyzing data through Google Analytics. Google analytics vs Crazy Egg. Case study: Make website and apply web analytics strategies.</p>					
MODULE 5 - SOCIAL MEDIA AND MOBILE ANALYTICS					(9L)
<p>Social Media Analytics : Measure, Analyze, Interpret, The conundrum of social media, Targeting your customers, Online social intelligence, Friends, Fans and Followers, Influence, score carding, monitoring tools and technologies. Mobile Analytics: Mobile Market places, Triangulating mobiles, mobile sites, mobile apps, mining mobiles</p>

COURSE TITLE		Big Data Analytics			CREDITS	3
COURSE CODE		CAB3722	COURSE CATEGORY	PE	L-T-P-C-S	3-0-0-3-0
CIA		50%			ESE	50%
LEARNING LEVEL		BTL-4				
CO	COURSE OUTCOMES				PO	
Upon completion of this course, the students will be able to						
1.	Describe big data and use cases from selected business domains				1, 2	
2.	Explain NoSQL big data management				1, 2	
3.	Install, configure, and run Hadoop and HDFS				1, 2	
4.	Perform map-reduce analytics using Hadoop.				3	
5.	Use Hadoop related tools such as HBase, Cassandra, and Hive for big data analytics				3	
MODULE 1 – INTRODUCTION					(9L)	
What is big data, why big data, convergence of key trends, unstructured data, industry examples of big data, web analytics, big data and marketing, fraud and big data, risk and big data, credit risk management, big data and algorithmic trading, big data and healthcare, big data in medicine, advertising and big data, big data technologies, introduction to Hadoop, open source technologies, cloud and big data, mobile business intelligence, Crowd sourcing analytics, inter and trans firewall analytics						
MODULE 2 – NoSQL					(9L)	
Introduction to NoSQL, aggregate data models, aggregates, key-value and document data models, relationships, graph databases, schemaless databases, materialized views, distribution models, sharding, master-slave replication, peer-peer replication, sharding and replication, consistency, relaxing consistency, version stamps, map-reduce, partitioning and combining, composing map-reduce calculations.						

MODULE – 3 : Hadoop		(9L)
Data format, analyzing data with Hadoop, scaling out, Hadoop streaming, Hadoop pipes, design of Hadoop distributed file system (HDFS), HDFS concepts, Java interface, data flow, Hadoop I/O, data integrity, compression, serialization, Avro, file-based data structures		
MODULE – 4: MapReduce		(9L)
MapReduce workflows, unit tests with MRUnit, test data and local tests, anatomy of MapReduce job run, classic Map-reduce, YARN, failures in classic Map-reduce and YARN, job scheduling, shuffle and sort, task execution, MapReduce types, input formats, output formats.		
MODULE 5 – : Big data Analysis		(9L)
Hbase, data model and implementations, Hbase clients, Hbase examples, praxis. Cassandra, Cassandra data model, Cassandra examples, Cassandra clients, Hadoop integration, Hive, data types and file formats, HiveQL data definition, HiveQL data manipulation, HiveQL queries.		
TEXT BOOKS

COURSE TITLE	R Programming			CREDITS	3
Course Code	CAB3723	Course Category	PE	L-T-P-C-S	3-0-0-3-0
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-2				
	COURSE OUTCOMES				PO
	At the end of the course the students will be able to				
1.	Learn about R fundamentals				1,5
2.	Know to implement R operator and R functions				1,5
3.	Learn to work with Lists and Frames				1,5
4.	Be able to work with Tables				1,5
5.	Know about basic Programming Structures in R				1,5
MODULE 1 – Introduction.					(9L)
R – OVERVIEW-Evolution of R -Features of R 2. R – ENVIRONMENT SETUP -Local Environment Setup-BASIC SYNTAX -R Command Prompt - Script File - R – DATA TYPES -Vectors -Lists -Matrices -Arrays-Factors -Data Frames - R – VARIABLES -Variable Assignment -Data Type of a Variable Finding Variables -Deleting Variables					
MODULE 2 – OPERATORS					(9L)
R – OPERATORS -Types of Operators -Arithmetic Operators-Relational Operators-Logical Operators Assignment Operators-Miscellaneous Operators - R – DECISION MAKING -R - If Statement-R – If...Else Statement -The if...else if...else -Switch Statement - R – LOOP-R - Repeat LoopR - While Loop -R – For Loop -Loop Control Statements-R-Break statement -R – Next Statement . R – FUNCTION -Function Definition -Function Components -Built-in Function –User-defined Function - Calling a Function -Lazy Evaluation of Function –User-defined Function -Calling a Function					
MODULE – 3 LISTS AND FRAMES					(9L)
LISTS- LISTS -Creating a -Naming List Elements - Accessing List Elements -Manipulating List Elements -Merging Lists Converting List to Vector - R – MATRICES -Accessing Elements of a Matrix - Matrix Computation-ARRAYS -Naming Columns and Rows -Accessing Array Elements-Manipulating Array Elements - R – FACTORS -Factors in Data Frame -Changing the Order of Levels -Generating Factor Levels 16. R – DATA FRAMES -Extract Data from Data Frame					
MODULE – 4 : FACTORS AND TABLES					(9L)
Common Functions Used with Factors- The tapply() Function - The split() Function -The by() Function - Working with Tables- Matrix/Array-Like Operations on Tables- Extended Example: Extracting a Subtable- Extended Example: Finding the Largest Cells in a Table- Table-Related Functions- The aggregate() Function- The cut() Function					
MODULE – 5 R PROGRAMMING STRUCTURES					(9L)
Control Statements- Loops- Looping Over Nonvector Sets - if-else- Arithmetic and Boolean Operators and Values- Default Values for Argument- Return Values- Deciding Whether to Explicitly Call return() - Returning Complex Object- Functions Are Objects..					
LAB / MINI PROJECT/FIELD WORK					

TEXT BOOKS	
1.	Matloff, Norman. The art of R programming: A tour of statistical software design. No Starch Press, 2011.
REFERENCE BOOKS	
1.	Crawley, Michael J. The R book. John Wiley & Sons, 2012.
E BOOKS

MOOC	
1.	R Programming Coursera –Johns Hopkins university

COURSE TITLE	Big Data Framework			CREDITS	3
COURSE CODE	CAB3724	COURSE CATEGORY	PE	L-T-P-C-S	3-0-0-3-0
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Understand the basics of Big Data.				1, 2
2.	Implement the basic operations in Scala.				1, 2
3.	Develop custom Scala functions as per the requirement.				1, 2
4.	Understand the basics of RDDs.				3
5.	Illustrate spark runtime environment.				3
MODULE 1 – INTRODUCTION TO BIG DATA					(9L)
What is big data?, the four V's of big data, Distributed File System, functional programming vs object oriented programming, advantages of scala, spark streaming					
MODULE 2 –BASIC OPERATIONS IN SCALA					(9L)
Variables and functions in scala, looping in scala, importance of vals, sets and maps, understanding classes and singleton objects, rich wrappers, objects and variables, for expression, try expression, match expression					
MODULE – 3 :FUNCTIONS AND CONTROL STATEMENTS IN SCALA					(9L)
Nested functions-first class functions-placeholder syntax-closures-repeated parameters-tail recursion-reducing code duplication-carrying-by name parameters-writing new control structures.					
MODULE – 4: RDD BASICIS					(9L)
RDD basics, creating RDD,RDD transformations, passing functions to spark, aggregation on pair RDD, grouping data on pair RDD, joins on pair RDD, sorting data in pair RDD, data partitioning in RDDs					
MODULE 5 – SAVING DATA, COMPRESSIONS, SPARK RUNTIME ARCHITECTURE					(9L)

Saving data into various formats like text, json, csv, sequence files, object files etc. compression, spark sql, accumulators, fault tolerance, broadcast variables, Numeric RDD operations, spark runtime architecture, cluster managers

TEXT BOOKS	
1.	Martin Odersky, Lex Spoon, Bill Venners, Programming in Scala: A comprehensive Step-by-Step Scala Programming Guide , Third Edition, Artima, 2016
2	Holden Karau, Andy Konwinski, Patrick Wendell, Matei Zaharia, Learning Spark , Orelly, 2016
REFERENCE BOOKS	
1.	Sandy Ryza, Uri Laserson, Sean Owen and Josh Wills , Advanced Analytics with Spark , Orelly, 2017
2.	Cay Hortsmann, Scala for the Impatient, Pearson Education, 2012.

COURSE TITLE		SEMANTIC WEB			CREDITS	3
COURSE CODE		CAB3725	COURSE CATEGORY	PE	L-T-P-C-S	3-0-0-3-0
CIA		50%			ESE	50%
LEARNING LEVEL		BTL-4				
CO	COURSE OUTCOMES					PO
Upon completion of this course, the students will be able to						
1.	Understand Knowledge Representation for the Semantic Web					1,2,3
2.	Design Resource design framework schemas					2,3
3.	Model Ontology using SPARQL and OWL					1,2,3
4.	Illustrate various rules for ontology					1,2,3
5.	Understand the principles of Ontology Engineering					1,2,3,4
MODULE 1 – Semantic Web Vision						(5L)
Motivation for the Semantic Web - Design Decisions for the Semantic Web - Basic Technology for the Semantic Web - The Web Architecture of the Semantic Web - Semantic Web Technologies - A Layered Approach						
MODULE 2 – Describing Web Resources: RDF						(9L)
Introduction - RDF: Data Model - RDF Syntaxes - RDFS: Adding Semantics - RDF Schema: The Language - RDF and RDF Schema in RDF Schema - An Axiomatic Semantics for RDF and RDF Schema - A Direct Inference System for RDF and RDFS						

MODULE 3 – SPARQL and OWL		(12L)
SPARQL Infrastructure - Basics: Matching Patterns - Filters - Constructs for Dealing with an Open World - Organizing Result Sets - Other Forms of SPARQL Queries - Querying Schemas - Adding Information with SPARQL Update - The Follow Your Nose Principle - Requirements for Ontology Languages - Compatibility of OWL2 with RDF/RDFS - The OWL Language - OWL2 Profiles		
MODULE 4 – Logic and Interfaces : Rules		(10L)
Introduction - Example of Monotonic Rules: Family Relationships - Monotonic Rules: Syntax - Monotonic Rules: Semantics - OWL2 RL: Description Logic Meets Rules - Rule Interchange Format: RIF - Semantic Web Rules Language (SWRL) - Rules in SPARQL: SPIN - Nonmonotonic Rules: Motivation and Syntax - Example of Nonmonotonic Rules: Brokered Trade - Rule Markup Language (RuleML)		
MODULE 5 - Ontology Engineering		(9L)
Constructing Ontologies Manually - Reusing Existing Ontologies - Semiautomatic Ontology Acquisition - Ontology Mapping - Exposing Relational Databases - Semantic Web Application Architecture		
TEXT BOOKS		
1.	Grigoris Antoniou Paul Groth Frank van Harmelen Rinke Hoekstra, "A Semantic Web Primer", Third edition, MIT Press , 2012.	
2.	Social Networks and the Semantic Web, Peter Mika, Springer, 2007.	
REFERENCE BOOKS		
1.	Semantic Web Technologies, Trends and Research in Ontology Based Systems, J. Davies, R. Studer, P. Warren, John Wiley & Sons.	
2	Semantic Web and Semantic Web Services -Liyang Lu Chapman and Hall/CRC Publishers,(Taylor & Francis Group)	
3	Information sharing on the semantic Web – Heiner Stuckenschmidt; Frank Van Harmelen, Springer Publications.	
4	Programming the Semantic Web, T. Segaran, C. Evans, J. Taylor, O’Reilly, SPD.

COURSE TITLE		DATA VISUALIZATION TECHNIQUES AND TOOLS		CREDITS	3
COURSE CODE		CAB3726	COURSE CATEGORY	PE	L-T-P-C-S 3-0-0-3-0
CIA		50%		ESE	50%
LEARNING LEVEL		BTL-4			
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Understand Data visualization, process and its relationships				1,2,3
2.	Use visualization applications to explore the data				1, 4,
3.	Understand and implement Layout and Mapping process to create effective visualizations				2,3,5
4.	Use story telling principles and interaction methods				2,3, 5
5.	Generate web-based visualizations using D3 and Java script.				2,3, 5
MODULE 1 – INTRODUCTION					(9L)
Data Visualization-Introduction, Data to visualization, Data Visualization process - Data Types and Dataset Types, relationships and visualization formats- Basic Principles for data visualization - Spatial Data, Graphic Design, Graphical Integrity					
MODULE 2 – DATA-DRIVEN DOCUMENTS(D3)					(9L)
HTML, CSS, DOM, javascript and SVG method chaining, D3: introduction, D3 Key Features- Data – Binding Data. Drawing with Data- Setting Attributes, Setting Styles Sketching, Drawing SVGs, Making Bar Charts, Making Scatter plots, Scales, Statistical Graphs, Axes, HD data, filtering, updates, transition and motion, paths, Brushing & Linking. Animation. Aggregation, Tree and Network					
MODULE 3 – LAYOUTS AND MAPPING					(9L)
Layouts: Pie Layout, Stack Layout, Force Layout Maps. Dot density maps, Geomapping: JSON, Projection, Choropleth Maps, data by country, Symbol Maps, Panning, Cartograms, Zooming, Visual Channels, Value labels, Acquiring and preparing raw Geodata, Exporting.					
MODULE 4 – COLOR PROCESSING					(9L)
Color: Introduction, Color Processing. Human color perception, Color blindness, opponent process theory Color Spaces. Uniform color spaces, simultaneous contrast, Reflection and absorption, Colors for Visualization- Cognition. Looking vs. Seeing. Image Gist. Gestalt Principles. Visual Attention. Visual Working & Long-Term Memory					
MODULE 5 - INTERACTION, TABLES AND PRESENTATIONS					(9L)
Types of interaction- feedback/animation, Visual Story Telling. Selection, details and highlighting, zooming, semantic zooming, van Wijk smooth zooming, Views: Reducing attributes, Multiple views Multiform views small multiples, interaction with Multiform and small multiples, Brushing navigation, navigation constraints. Messaging. Effective Presentations.

COURSE TITLE	DATA CLASSIFICATION METHODS AND EVALUATION			CREDITS	3
COURSE CODE	CAB3727	COURSE CATEGORY	PC	L-T-P-C-S	3-0-0-3-0
CIA	50%			ESE	50%
LEARNING LEVEL	BTL-4				
CO	COURSE OUTCOMES				PO
Upon completion of this course, the students will be able to					
1.	Illustrate the concepts of the Data Classification.				1, 2, 3
2.	Apply Probabilistic Models for Classification				1, 2,3, 4, 5
3.	Apply Rule-Based Classification				1, 2, 3,4, 5
4.	Implement Support Vector Machines and Neural Networks.				3, 4, 5
5.	Visualize the output of Big Data Classification using various tools				3,4, 5,7
MODULE 1 – An Introduction to Data Classification					(9L)
Introduction: Common Techniques in Data Classification, Handling Different Data Types, Variations on Data Classification, Feature Selection for Classification: A Review: Introduction, Algorithms for Flat Features, Filter Models, Algorithms for Structured Features, Algorithms for Streaming Features,					
MODULE 2 – Probabilistic Models for Classification					(9L)

Introduction, Naive Bayes Classification , Logistic Regression Classification , Probabilistic Graphical Models for Classification, Decision Trees: Theory and Algorithms : Introduction, Top-Down Decision Tree Induction, Case Studies with C4.5 and CART, Scalable Decision Tree Construction , Incremental Decision Tree Induction,	
MODULE 3 – Rule-Based Classification (9L)	
Introduction, Rule Induction, Classification Based on Association Rule Mining, Applications Instance-Based Learning: A Survey: Introduction, Instance-Based Learning Framework, Lazy SVM Classification , Locally Weighted Regression, Lazy Naive Bayes, Lazy Decision Trees, Rule-Based Classification, Radial Basis Function Networks: Leveraging Neural Networks for Instance-Based Learning, Lazy Methods for Diagnostic and Visual Classification	
MODULE 4 – Support Vector Machines and Neural Networks (9L)	
Support Vector Machines, Neural Networks: A Review, Fundamental Concepts, Single-Layer Neural Network, Kernel Neural Network, Multi-Layer Feed forward Network, Deep Neural Networks, Introduction, Generic Stream Classification Algorithms, Rare Class Stream Classification, Discrete Attributes: The Massive Domain Scenario, Other Data Domains,	
MODULE 5 - Big Data Classification (9L)	
Introduction , Scale-Up on a Single Machine, Scale-Up by Parallelism, Text Classification: Introduction, Feature Selection for Text Classification, Decision Tree Classifiers, Rule-Based Classifiers, Probabilistic and Naive Bayes Classifiers, Linear Classifiers, Proximity-Based Classifiers, Classification of Linked and Web Data, Meta-Algorithms for Text Classification, Leveraging Additional Training Data, Multimedia Classification, Time Series Data Classification, Discrete Sequence Classification, Collective Classification of Network Data, Active Learning: A Survey	
TEXT BOOKS

COURSE TITLE		PRINCIPLES DEEP LEARNING		CREDITS	3	
COURSE CODE		CAB3728	COURSE CATEGORY	PC	L-T-P-C-S	3-0-0-3-0
CIA		50%		ESE	50%	
LEARNING LEVEL		BTL-3				
CO	COURSE OUTCOMES				PO	
Upon completion of this course, the students will be able to						
1	Design a simple Neural Networks using Linear Perceptron.				1, 2	

2	Design a Convolutional Neural Networks using TensorFlow.	1, 2, 3
3	Explore the Differentiable Neural Computers.	1,2,3,4
4	Explore the Deep Reinforcement Learning.	1, 2, 4, 5,7
5	Design the simple deep learning algorithms for the given applications.	1, 2, 3,5,7
MODULE 1 – THE NEURAL NETWORK		(9)
Mechanics of Machine Learning , The Neuron, Linear Perceptron, Linear Neurons and Their Limitations, Sigmoid, Feed-Forward Neural Networks, Fast-Food Problem, The Delta Rule.		
MODULE 2 – CONVOLUTIONAL NEURAL NETWORKS & TENSORFLOW		(9)
Neurons in Human Vision, Convolutional Layer, Convolution Networks, TensorFlow, Creating and Manipulating TensorFlow Variables, TensorFlow Operations, Implementing an Autoencoder in Tensor.		
MODULE 3 – MEMORY AUGMENTED NEURAL NETWORKS		(9)
Neural Turing Machines, Attention-Based Memory Access, Differentiable Neural Computers (DNC) - Memory Reuse - Temporal Linking - Controller Network.		
MODULE 4 – DEEP REINFORCEMENT LEARNING		(9)
Deep Reinforcement Learning - Markov Decision Processes, Policy Versus Value Learning, Pole-Cart with Policy Gradients, Q-Learning		
MODULE 5 – APPLICATIONS		(9)
Deep learning for Real time applications, Deep Learning Applications at the Enterprise Scale, Deep Learning Models for Healthcare Applications.
